

Lilly SSO Support for Order2U

Order2U

As communicated previously, Lilly is in the process of implementing a solution to provide a single sign-on experience to our clinical investigators to allow usage of the same account and password in multiple systems. As a user of one of these systems, we are on the process of creating your new accounts. Unfortunately, as part of this process test emails were triggered from a sender “Exostar UAT Administrators” asking you to complete your registration that should be disregarded. If you try to complete registration using the link provided in that email, you will receive an error message. You will be receiving a subsequent email with the correct link to complete your registration coming from “Exostar Administrators”. We are very sorry for the confusion this has caused, if you have any questions, please contact your Lilly representative.

If you have questions about Investigator Initiated Research contact your Lilly Representative
